

KREEDA NATION

Where Teams Compete, Connect & Grow

/ Platform Admin

ADMIN GUIDE

Master control over Kreeda Nation HQ.

You run the platform.

As **Platform Admin** you configure catalogs, review incoming requests, keep vendors accountable, and unlock the whole revenue engine of Kreeda Nation. This guide walks through every tab of **/platform-admin** and highlights the flows that ship revenue.

■ **Tip.** Super Admin? You additionally see the **Team** tab to invite staff admins with scoped permissions (manage_events / manage_vendors / manage_listings / manage_reviews / manage_settings / manage_companies).

Dashboard & analytics

Landing view when you log in — KPI donuts for bookings, revenue, events, ecosystem. Click any donut to drill into the underlying tab (bookings → Bookings, revenue → Business, etc.).

- **Bookings** — today/last-7/last-30/all-time counts by status
- **Revenue** — platform ■ + offline ■ + commissions owed
- **Events** — public/pending approval
- **Ecosystem** — vendors / companies / players

Figure: Platform Admin dashboard with KPI donuts.

Corporate Services workspace

Six sub-tabs consolidated under one meta-tab:

- **RFQs** — inbox of HR/Organiser requests. Click a row to build a cost sheet, compose quotations, and chat with HR
- **Service Vendors** — internal procurement ledger (contacts, rate cards, preferred flag). Never surfaced to HR
- **Packages** — HR-facing tiered offerings composed from services + add-ons
- **Categories · Services · Add-ons** — the building blocks

Handling an RFQ end-to-end

1. New RFQ arrives → click **Start review** to move it to *under_review*
2. The **Cost Sheet** auto-seeds one line per selected service/add-on. Click **Auto-pick** for each service and the system assigns the top-ranked vendor (city match → preferred → lowest rate)
3. Edit qty / unit rate as needed → **Save cost sheet**
4. In **Quotation Builder**, choose per-line pricing: **Markup %** (default 25%) or **Fixed ■**. Set discount / tax / valid-until
5. Click **Create draft** — a versioned quote (v1, v2, ...) appears in history
6. Click **Send to HR** → HR receives a sanitised copy (never sees internal cost or margin)
7. HR either **Accepts** (RFQ → Approved, invoice auto-generated) or **Rejects with a reason** (RFQ → Negotiation; you can chat and send v2)
8. Once accepted, use the **Invoice** panel to Download PDF, create a Razorpay pay-link, or Mark paid

■ **Heads up.** Pricing privacy is a hard contract. Anything you save inside a cost sheet, or margin %, or gross margin — never reaches HR. HR only sees the final selling total, tax and total after you click **Send to HR**.

/ 3 • Events & Approvals

Events lifecycle

- **Events** tab — create, edit, delete events across all companies. Assign participating companies, upload banners, manage sponsors
- **Approvals** tab — organiser-created events land here as *pending_organiser_ack*. Approve to make public, reject with a reason (organiser resubmits after edits)
- **Sports** tab — configure sports registered on the platform (name, icon, scoring config)

/ 4 • Vendors, Listings, Bookings

Vendor management

- **Vendors** — approve/reject vendor signups, see their business type, city, offline_mode flag
- **Listings** — moderate every vendor listing (turf, court, coach, equipment)
- **Bookings** — analytics across all vendor bookings, filter by status and date
- **Commissions** — per-booking commission dues, mark paid, send reminders

/ 5 • Business & Companies

Corporate accounts

- **Companies** — HR/corporate signups
- **Organisers** — independent tournament organisers
- **Business** — sponsorship marketplace queue, deal negotiations

- **Users** — global user directory across all roles

[/ 6 · Settings, About, Reviews](#)

Platform configuration

- **Settings** — social URLs, contact info, commission %s, offline subscription pricing
- **About page** — the public /about page content
- **Reviews** — moderate flagged/pending reviews
- **Accounts** — deactivate/delete misbehaving accounts
- **Team** (super admin only) — invite staff admins, assign permissions
