SCORER CONSOLE

Ball-by-ball, point-by-point — the live scoring toolkit.

You're the source of truth.

Scorers are invited by an organiser or platform admin to score specific fixtures. Your inputs power the public live scoreboard, standings, and player stats.

Getting invited

1. Organiser adds you via **Events** → **Scorers** → **Invite**
2. You're emailed a login link + temp password (also visible to the organiser inside a modal)
3. Sign in at **/login** — you'll land on **/scorer/dashboard**

The console

/scorer/dashboard lists every fixture you've been assigned to. Click a fixture to open the sport-specific scoring UI:

- **Cricket** — ball-by-ball with over control, wide/no-ball/wide-off, dot/1/2/3/4/6, wicket flow
- **Badminton / Tennis** — game/set point control, tiebreak logic
- **Football / Kabaddi / Volleyball** — score buttons, event log

What updates live

- Public scoreboard at **/live/{fixture_id}**
- Event standings
- Player career stats

What you cannot do

Scorers cannot generate fixtures, edit events, or score fixtures they weren't assigned to — those return 403 by design. Ask your organiser if you need extra access.
