

Kreeda Nation

Run open tournaments, book vendors, score matches live — without needing a company.

Where Teams Compete, Connect & Grow

1. Welcome, organiser

Kreeda Nation gives independent tournament organisers the same power tools the corporate HR teams use — minus the corporate-domain requirement.

Sign up at **/signup-organiser** with *any* email — Gmail, Yahoo, Outlook or a custom domain all work. We verify it with a 6-digit code (sent right away from **admin@kreedanation.com**) before creating the workspace.

Email	Any provider — public or branded.
Phone	Optional, helps vendors / players reach you fast.
Brand name	Shown publicly on event pages, fixtures and scorecards.

Once signed in you'll land on **/dashboard** — same powerful layout HR teams use. Your **Organiser guide** link is always one click away in the top nav.

1a. What's new — leverage these features

The platform ships new capabilities every few weeks. Here's the short-list you should be actively using right now.

What's new for organisers

- **Ownership scoping** — you now only see teams and sponsors you created + those on events you own. Cleaner Manage tab, safer data.
- **Suggest new venue** — new button next to the venue picker on your Admin > New tournament form. If your venue isn't listed, submit its details and Kreeda Nation admin will reach out to onboard it.
- **Sponsorship marketplace** — publish sponsorship tiers on your event; interested sponsors express interest directly. Manage responses from the event detail page.
- **Dedicated organiser signup** at **/signup-organiser** with any email domain (Gmail / Outlook / etc.) — no corporate mandate.

1a. The event approval workflow (organiser-only)

Every event you create on Kreeda Nation goes through a lightweight admin review before becoming public. This protects audience quality across the platform — and it's quick.

The lifecycle

- 1 **You create the event** at `/dashboard` → **+ New tournament**. It is saved as a private draft with the status “**Pending your acknowledgement**”. It does NOT appear on the public events page yet.
- 2 **Open the event** to read the platform's tournament instructions (set by Kreeda Nation HQ). They cover fair-play, eligibility, sponsorship and content policies you must follow.
- 3 **Click the yellow *I agree & submit for approval*** button on the banner. The event moves to “**Awaiting platform admin approval**”.
- 4 **Wait briefly** — Kreeda Nation HQ typically reviews within a few business hours. You'll receive an **approval email** when they're done.
- 5 **If approved**: the event goes public, all tabs unlock, and the normal flow continues — add teams, generate fixtures, invite scorers, list sponsorships, etc.
- 6 **If rejected**: the email includes the admin's reason. Open the event, edit the details based on the feedback (dates, venue, sponsorship terms, etc.), and click **Resubmit for approval** — back to step 4.

What about HR / corporate events?

Events created under a corporate **HR account** do NOT need approval — they go live immediately. Approval is only required for events created by independent organisers.

Editing an event while it's pending is fine and recommended — fix issues before submitting. Once approved, the event is public; major changes (sport, venue, dates) should be communicated to participants via the description or your own channels.

2. Create a tournament

- 1 Click **+ New tournament** on `/dashboard` (or open `/admin`).
- 2 Pick a sport (cricket, football, badminton, quiz, hackathon...) and a format — **Round-robin** or **Knockout**.
- 3 Fill in name, description, venue and (optionally) a banner image URL.
- 4 Paste a **Live stream URL** (YouTube, Twitch, any platform) — every event visitor sees a “WATCH LIVE” button. You can edit it anytime from the event page.
- 5 Click **Create**. The event now lives at `/events/{id}` with public Fixtures / Standings / Teams tabs.

Use clear team names like “**Engineering Eagles**” / “**Sales Spartans**” and set a distinct colour — it makes the bracket and standings instantly readable.

3. Set up teams & captains (new event-scoped flow)

Open your event → switch to the **Teams** tab (visible to HR, admin and captains). The legacy `/teams` page is no longer in the public nav.

- 1 Click **NEW TEAM**. Enter team name, optional department, colour. Submit.
- 2 On the new team card, click **Assign captain** and pick from the registered players list. The captain is auto-added to the roster.

- 3 Click **Add player** on the team card. Two modes:
- 4 **Pick registered** — choose anyone in the global player directory.
- 5 **Quick add** — enter name + mobile + (optional) email. We create a player profile and show you a one-time temporary password to share. The player can change it on first login.
- 6 Remove a player anytime with the trash icon. Removing the captain clears that slot.

Captains can add & remove players on *their* team. They cannot create new teams. HR or admin still own the team list.

4. Generate fixtures & live-score

- 1 On the event page click **Generate fixtures**. Round-robin rotates pairings automatically; knockout builds the bracket with byes.
- 2 On any fixture row click **Update score**. The sport-specific scorer opens (cricket overs/wickets, football goals, badminton sets, etc.).
- 3 Toggle status to **LIVE** while play is on; Standings auto-update on completion. WebSocket broadcasts the score change to every open browser instantly.
- 4 Spectators with the live-stream URL click **WATCH LIVE** from the event header to jump to your YouTube/Twitch feed.

5. Hire services and book grounds

Marketplace services (custom jerseys, trophies, catering, ...)

Open **/services** for the 17-service catalogue. Fill the dynamic form, submit a request. Track under **/bookings**.

Book a ground / coach / referee (new wizard)

Open **/hire**. It's now a guided wizard:

- 1 **Step 1** — Pick the category (Grounds / Courts / Coaches / Referees ...).
- 2 **Step 2** — Pick the sport / surface (Cricket, Football, Tennis ...).
- 3 **Step 3** — Pick the city. Only cities with verified vendors for your sport appear.
- 4 **Step 4** — Pick a venue card. The booking modal shows the price/hour and lets you choose date + start time + total **hours**. Total is computed live.
- 5 Click **Send request**. You land on **/bookings** where your booking shows status **Awaiting vendor**.

Vendor accepts/declines first → Kreeda Nation HQ confirms or overrides. Every status change is visible on your booking card with the latest message + author. You can Cancel request any time before the booking is finalised.

Vendor contact details stay hidden until Kreeda Nation confirms — we keep the marketplace neutral. After confirmation we connect you with the vendor.

6. Sponsors — per-tournament

Sponsors are managed at the **tournament** level. Open an event you own and switch to the **Sponsors** tab to add sponsors with tier (Title / Gold / Silver / Bronze), logo, website and description. Public visitors see those sponsors only on that event's page.

Pitch sponsors on per-tournament packages: Title for a premium logo, Gold/Silver/Bronze tiers for graded exposure.

7. Live updates

- Every event with a stream URL shows a red **WATCH LIVE** CTA in the header.
- Score changes propagate via WebSocket — no refresh needed for spectators.
- Knockout brackets propagate winners automatically as you complete matches.
- Standings recalc on every completed match (3 pts win, 1 pt draw).

8. CricHeroes-style cricket scoring

Open any cricket fixture → **Update score** to launch the rich live scorer. The flow matches what your captains see on apps like CricHeroes, so the learning curve is near-zero:

- 1 **Toss** — pick which team won and whether they chose to bat or bowl. The scorer auto-sets the batting / bowling sides.
- 2 **Playing XI** — choose the 11 players from each team. Required before the first ball.
- 3 **Striker / non-striker / bowler** — pick before the first delivery; the scorer rotates strike automatically on odd-run balls and end-of-over events.
- 4 **Ball by ball** — runs, wides, no-balls (with free-hit auto-flag), byes, leg-byes, wickets (caught/bowled/run-out etc.). Partnerships, overs, current run-rate and required rate all update live.
- 5 **Undo** any ball if you mis-tapped. The system recomputes batting / bowling cards and partnership widget instantly.

Share `/live/<fixture_id>` with spectators who don't have an account — they get the same live scorecard with no login required.

9. Manage existing bookings (cancel / reschedule)

Open **/bookings** → click any active booking. Depending on the vendor's policy you'll see:

- **Cancel request** — free / partial refund / no refund based on hours-to-slot and the vendor's cancellation policy. The refund amount is computed live.
- **Reschedule** — pick a new date + start time. Free reschedules are tracked per booking; once exhausted, the vendor's reschedule fee applies.
- Every action writes a **notification** entry visible to you, the vendor and HQ — full audit trail.

After a booking enters a final state (Confirmed, Rejected or Cancelled) only Kreeda Nation HQ can touch it. This protects everyone's audit log.

10. Upcoming bookings widget & dashboard

Your **/dashboard** shows an **Upcoming bookings** widget pinned at the top — the next 5 confirmed / pending slots across all your venues, with date, vendor and total. Click any card to jump straight into the booking detail.

Look at the dashboard daily — vendor accept / decline actions surface here before email is wired up.

11. Sponsorship marketplace — earn revenue from your events

Open any event you run to its **Sponsorship** tab to enable the marketplace. Brands can then discover, browse and request the slots you list — Kreed Nation handles discovery, you handle approvals.

- 1 Open **/events/{event}** → click **Sponsorship** tab.
- 2 Tick **Accept sponsorships**. Fill in expected reach, expected participants, target audience, demographics, social-media reach, livestream views, venue, event category and (optionally) a brochure URL — these power the sponsor browse filters.
- 3 Tick the **data-share agreement** checkbox at the bottom — required before your listing goes live.
- 4 Click **Save sponsorship settings**.
- 5 Add opportunities below — name, type, price, quantity, benefits. Common bundles: *Title* (qty 1, top price), *Associate* (qty 3-5), *Best Batsman / Bowler*, *Streaming*, *Boundary Branding* (qty 5+).

Sponsors browse the marketplace at **/sponsorships** with filters by sport, location, budget, audience size, event type. The lower your minimum price, the wider your reach — Boundary slots are great entry points.

Approving a sponsor

When a sponsor clicks **I'm interested** on one of your slots, an entry appears in your **Interest queue** at the top of the Sponsorship tab with their company, industry, budget range, website & proposal. Click **Accept** to award the slot (it auto-marks SOLD when all slots fill) or **Reject**.

When a slot is sold

The opportunity flips to **SOLD** and a ♦ **Sponsored by [Brand]** badge is added to the public listing. Any other still-pending interests on that slot are auto-rejected. The badge surfaces wherever the event is shown — Events list, public event page, and the public sponsorships endpoint.

12. Sponsoring other companies' events

Your company login can also **sponsor** other organisers' events — no separate account needed. Open the **Sponsor hub** link in your top nav. There you'll find your sponsor profile (industry, budget range, interests, target locations) and a link to browse all sponsorship-ready events at **/sponsorships**.

Fill out your sponsor profile fully — organisers see your industry, budget range and website on every interest you submit, which dramatically improves your acceptance rate.

13. Where to find your guide

Once signed in, this HR manual is always available from the **top navigation** — look for **HR guide** next to your menu items. The footer no longer carries role guides; we surface only the one relevant to your account so you never have to wonder which PDF to open.

14. What's new — scorers, fixture lock & marketplace clarity

Recent product updates that change day-to-day operations for HR teams running tournaments.

Invite a match scorer

On any event you own → open the **Scorers** tab. Enter a scorer's email, pick scope (**All fixtures** or **Specific fixtures**) and send. If they aren't on Kreeda Nation yet, we auto-create a lightweight *scorer* account and email them login credentials. The temp password is also surfaced inline once for manual sharing.

- Scorers can update live scores **ONLY** for the events / matches you assign — they cannot edit your event, generate fixtures, or access scoring of other tournaments.
- They land at **/scorer/dashboard** after login showing every assigned event and fixture.
- Remove a scorer anytime with the trash icon on their row.

Fixture lock

Once any fixture moves out of **Scheduled** (i.e. the tournament has started), the **Generate fixtures** button is automatically disabled and reads **Fixtures locked**. This protects live and completed match scores from being wiped by an accidental regenerate.

Cross-company permission scoping

HRs of other companies can no longer touch your event. The **Generate fixtures** button, the score-update controls, and the scorer-invite UI are all hidden for anyone outside your company. The backend also enforces this (returns 403).

Sponsors tab — direct vs marketplace

If your event uses the Sponsorship marketplace, awarded sponsors are merged into the same **Sponsors** tab as manually-added ones. A filter row above the cards lets visitors flip between **All**, **Direct** and **Via marketplace** — useful when you want to highlight organic marketplace pull versus pre-negotiated partners.

15. What's new — company address, smarter venue picker & vendor memberships

More recent updates to the HR workflow.

Editable company address

Your company address is now a first-class field. Enter it during **/signup-company** (street, city, state, pincode) and edit it anytime from **/dashboard** → **Company profile**. It surfaces on event public pages, invoices and vendor booking notifications so vendors and sponsors always know who they're working with.

Sport-filtered venue picker with location search

When you create a new tournament, the venue picker now filters vendor grounds & courts **by the sport you selected**. A free-text **Location** search lets you narrow down further to a neighbourhood, road or landmark. No more scrolling through irrelevant football pitches when you're hosting a badminton tournament.

Vendor memberships — subscribe for recurring access

Many vendors now publish **membership plans** on their profile (Monthly / Quarterly / Annual). Subscribing locks in a discounted slot rate and reserves priority booking — useful for companies running weekly leagues. Open any vendor card → **Memberships** section to browse plans. Payment collection (Razorpay) is shipping shortly; until then plans are managed offline with the vendor.

Native Android & iOS apps in build

We've shipped a public Mobile API spec at **/docs/MOBILE_API.md** so our Flutter developers can build the native apps. HR users will get a focused mobile experience for live scoring, booking approvals and team management. Watch for the app-store badges on the homepage.

*Need help? Email hello@kreedanation.io — we usually reply within one business day. Forgot your password? Visit **/forgot-password** (works for HR, vendors and admins) or **/players/forgot-password** for player accounts. Tip: once you sign in, this guide is one click away from the **top navigation bar** — no need to dig through the footer.*
