

PlaySphere

Run end-to-end internal tournaments and hire services from one dashboard.

Where Teams Compete, Connect & Grow

1. Onboard your company

60-second setup. Your data, tournaments and team rosters are completely isolated from every other company on the platform.

- 1 Open **/signup-company** (header CTA “For Companies”).
- 2 Enter your company name, admin name, phone and a work email.
- 3 Choose a password (≥ 6 chars) and click **Create company account**.
- 4 You are taken to **/dashboard**. From here you can launch tournaments, hire services and review bookings.

2. Create a tournament

- 1 Click **+ New tournament** on **/dashboard** (or open **/admin**).
- 2 Pick a sport (cricket, football, badminton, quiz, hackathon...) and a format — **Round-robin** or **Knockout**.
- 3 Fill in name, description, venue and a banner image URL.
- 4 Click **Create**. The event now lives at **/events/{id}** with public fixtures / standings / teams tabs.

Mixing departments? Use clear team names like “Engineering Eagles” / “Sales Spartans” and set a distinct color — it makes the bracket and standings instantly readable.

3. Register teams & rosters

- 1 Open **/register-team**.
- 2 Enter team name, department, captain and pick a colour.
- 3 Pick the tournament from the Event dropdown (optional).
- 4 Add players — type freeform, or click any chip in “**Pick from registered company players**” to auto-fill name & role.
- 5 Click **Register team**.

The chip list only shows players who registered on PlaySphere and chose your company — so you never accidentally pull in someone from another company.

4. Generate fixtures & live-score

- 1 On the event page click **Generate fixtures**. Round-robin rotates pairings automatically; knockout builds the bracket with byes.
- 2 On any fixture row click **Update score**. The sport-specific scorer opens (cricket overs/wickets, football goals, badminton sets, etc.).
- 3 Toggle status to **LIVE** while play is on; Standings auto-update on completion. WebSocket broadcasts the score change to every open browser instantly — no refresh required.

5. Hire services

Marketplace services

Open **/services** to browse the 17-service catalogue (Live YouTube streaming, Jerseys, Caps, Trophies with image picks, Custom Medals, Banners, Catering, DJ, Photography, Videography, Drone, Anchoring, First Aid, Match Officials, ...). Click a card → fill the dynamic form → submit a quote request. Track status under **/bookings**.

Hire grounds, coaches, officials

Open **/hire** from the nav. Tabs cover Grounds, Courts, Coaches, Referees, Umpires, Trainers, Photographers and Videographers. Filter by city. Every visible card carries a green ✓ **Verified** badge — only listings approved by PlaySphere HQ appear here. Click a listing → pick date, start & end time → **Request booking**. The vendor confirms or declines from their dashboard.

Vendor contact details are deliberately hidden from you until they confirm — this is how PlaySphere keeps the marketplace neutral. After confirmation we connect you over email.

6. Sponsors — now per-tournament

Sponsors are managed at the **tournament** level, not site-wide. Open an event you own and switch to the **Sponsors** tab to add sponsors with tier (Title / Gold / Silver / Bronze), logo URL, website and description. Public visitors see those sponsors only on that event's page — keeping every sponsorship deal scoped to the event it funds.

Pitch sponsors on per-tournament packages: Title for one premium logo, Gold/Silver/Bronze tiers for graded exposure. Sponsors only appear on the events they sponsor — a clean ROI story for HQ.

7. Live updates

- Every event page shows a **LIVE STREAM ON** badge — score changes appear instantly via WebSocket.
- Knockout brackets propagate winners automatically as you complete matches.
- Standings recalc on every completed match (3 pts win, 1 pt draw).
