

# PlaySphere

Everything you need to list grounds, courts, coaches and other on-ground services.

*Where Teams Compete, Connect & Grow*

## 1. Who this guide is for

Anyone offering grounds, courts, coaching, refereeing, umpiring, training, photography or videography services for corporate tournaments. PlaySphere helps you reach HR teams across companies — your business identity stays private until you accept a booking.

## 2. Create your vendor account

- 1 Open [/vendor/signup](#) from the footer link “**Become a vendor**”.
- 2 Fill in business name, contact name, city, mobile and a working email.
- 3 Pick your **primary service type** (Ground / Court / Coach / Referee / Umpire / Trainer / Photographer / Videographer). You can still add listings of **any** other type later — this just sets the default.
- 4 Choose a password and click **Create vendor account**.
- 5 You are taken straight to [/vendor/dashboard](#). A yellow “**PENDING APPROVAL**” chip is shown on your business banner until PlaySphere HQ verifies you.

**Tip — vendors are approved per business and per listing. Make sure your business details are accurate before adding listings; this speeds up approval. Once a listing is live, it carries a green ✓ Verified by PlaySphere badge in the marketplace — instant trust signal for HR teams browsing /hire.**

## 3. Add a listing (ground, court, coach, etc.)

- 1 On your dashboard click **+ New listing**.
- 2 Pick what you're listing in the “**What are you listing?**” dropdown. The form adapts to your choice.
- 3 Enter title, description, city, price + currency (USD or INR) and price unit (per hour / per session / per match etc.).
- 4 Grounds & courts: enter capacity and tick the sports the venue supports.
- 5 Coaches, referees, umpires, trainers: tick the sports you specialise in.
- 6 Upload 5–10 image URLs of the venue or your work. Vendors with rich photo sets convert ~3× better.
- 7 Click **Save listing**. The listing appears in your dashboard with a **PENDING** tag until platform admin approves it.

### Multiple listings per account

One account can hold any number of listings of any type — e.g. two grounds in different parts of town, a coach service and a photographer package, all under one email. Each listing is reviewed independently.

If you change a listing's type (e.g., a coach profile to a referee profile) it is sent back to PlaySphere HQ for re-approval before re-publishing.

## 4. Handle booking requests

When a company books your listing it appears in the **Booking requests** table on your dashboard with status **PENDING**.

- 1 Review the requested date, start–end time and any notes from the HR team.
- 2 Click **Confirm** or **Decline**. The HR team gets the new status instantly.
- 3 Confirmed bookings remain visible in your dashboard for record keeping. Past bookings stay forever.

Your contact details are never exposed to the HR team in the marketplace. They only see your listing photos, price and city. Confirming a booking is how you both signal you're ready to be put in touch.

## 5. Pricing & payouts

|               |                                                                                    |
|---------------|------------------------------------------------------------------------------------|
| Currency      | USD or INR — set per listing                                                       |
| Pricing model | Flat price × price unit (per hour / per match / per session)                       |
| Discounts     | Add seasonal pricing by editing each listing or duplicating with a different price |
| Payments      | Handled offline between you and the HR team for now; PlaySphere Stripe checkout is |

## 6. Common questions

### How long does approval take?

Usually under 24 hours. You'll see your listing go from **PENDING** → **LIVE** in the dashboard.

### Can I temporarily hide a listing?

Yes — edit the listing and uncheck **Active**, or ask platform admin to “Unpublish”. Bookings already in flight are unaffected.

### Can multiple staff log in to the same vendor account?

Today it's one email per business. Team logins are on the roadmap — drop us a note if you need it sooner.

Need help? Email [hello@playsphere.io](mailto:hello@playsphere.io) — we usually reply within one business day.
